

AI First UI & UX

Design leader with 12+ years delivering user-centered digital products across banking, healthcare, government and consumer sectors.

I specialize in AI-first UI/UX (Agentic & GenAI), UX strategy and design systems—translating complex business and technical requirements into accessible, scalable experiences.

Experienced in discovery, user research, information architecture, interaction design and facilitation; I partner closely with product, engineering and business leaders to drive measurable usability and product outcomes.

Currently pursuing an Advanced Certificate in UIUX (Agentic AI & GenAI) at IIT Madras Pravartak to deepen expertise in AI-augmented experiences.

Employment History

Design Manager at PwC Pricewaterhousecoopers

2023 – PRESENT

Core Design Activities

Conducting user research, stakeholder interviews, and competitive analysis to inform design decisions

Creating user flows, journey maps, wire frames and high-fidelity UI designs using Figma and related tools

Leading and facilitating workshops, including design thinking and co-creation sessions with clients and internal teams

Translating business and technical requirements into intuitive, human-centered design solutions

Defining and maintaining design systems, ensuring consistency, scalability, and accessibility

Collaborating closely with developers, architects, and product teams for seamless implementation

Skills

Figma

Design Systems

UX Strategy

User Research

Usability Testing

Accessibility (WCAG)

Preparing detailed design documentation and specifications for development handoff

Reviewing design deliverables to ensure they meet usability, accessibility, scalability, and performance standards

Participating in client-facing meetings, pre-sales activities, and design presentations to align on strategy and scope

Conducting usability testing, gathering feedback, and iterating based on insights

Evaluating non-functional requirements (NFRs) and incorporating them into the design architecture

Supporting design reviews, audits, and validations to maintain quality and design integrity

VP Design at TechnoGen

2022 – 2023

Core Design Activities

Conducting user research, stakeholder interviews, and competitive analysis to inform design decisions

Creating user flows, journey maps, wire frames and high-fidelity UI designs using Figma and related tools

Leading and facilitating workshops, including design thinking and co-creation sessions with clients and internal teams

Translating business and technical requirements into intuitive, human-centered design solutions

Defining and maintaining design systems, ensuring consistency, scalability, and accessibility

Collaborating closely with developers, architects, and product teams for seamless implementation

Preparing detailed design documentation and specifications for development handoff

Reviewing design deliverables to ensure they meet usability, accessibility, scalability, and performance standards

Participating in client-facing meetings, pre-sales activities, and design presentations to align on strategy and scope

Conducting usability testing, gathering feedback, and iterating based on insights
